

Radiology Findings

Patient Name : BANAT, MOHAMMED HASAN MOUSA
Case No : 20032
D.O.B / Age : 27-01-1978 / 41
Gender : M
Attending Physician: Mohammad Rashid
Admitted on :
Discharged on:
MRN : 12531
Telephone : +962 797748881
Department : Radiology
Length of stay: 0 days

Clinic Order

Request Date :
Procedure/Exam Name : MRCP (Cholangiogram)

Findings/Assessment

Result : Abnormal
Result Date : 08-12-2019
Result Time : 16:13:45
Findings User : Mr. Abdelrahman Labib
Comment
Findings :

MR Cholangiopancreaticography (MRCP)

SSh MRCP thick slabs in addition to SSh T2 & T2-FS images were obtained.

The gallbladder is distended with no filling defects. The common bile duct is normal in diameter with no filling defects. The intra hepatic biliary ducts are also visualized and appeared normal in caliber. No evidence of intrahepatic biliary duct dilatation. The pancreatic duct is well visualized and normal in diameter. No suggestion of pancreatic divisum.

Conclusion

-No evidence of intra or extra hepatic biliary abnormalities.
